## WORK EXPERIENCE

Aug 2022 - Present

**ICF**

icf.com

### TECHNICAL LEAD

- *Architected ground up redo of government application infrastructure for hosting Drupal. This included use of a containerized and automated deployment approach coupled with best practices for Drupal application hosting.*
- *Directed and managed a team of over ten developers on both the application and infrastructure side to successfully launch a brand new site feature complete and on time.*
- *Collaborated directly with product owner, technical product owner and design team to facilitate actionable stories and tickets for the development team. This included requirements definition, acceptance criteria and testing instructions for QA team.*

Oct 2021 - Aug 2022

**ACAMS**

acams.org

### TECHNICAL LEAD

- *Directly managed a team of developers including on-shore, near-shore and off-shore contributors to manage a complex Drupal w/ Drupal Commerce implementation.*
- *Directed and managed a large operation of migrating the entire Drupal application and stack to a new PaaS. This required holistic and tactful approaches to fulfill the requirement of little to no downtime when going live.*
- *Architected and composed a ground up implementation of new CI/CD process. These later served as the essential backbone and standardization for future deployments and workflows used throughout the entire team and organization.*

## WORK EXPERIENCE

(CONTINUED)

Sep 2020 - Oct 2021

**IPC**

ipc.org

### TECHNICAL LEAD

- *Directly managed architecture and development of large and custom Drupal Commerce implementation. This scoped and holistic approach delivered a ground up eCommerce site on time that fully supported all business use cases and customer needs.*
- *Gathered requirements, user stories and specifications from all levels of business including C-level requests to better support and provide clear picture on exactly what was to be produced.*
- *Architected custom API and data flow to support unique business rules and customization of base Drupal Commerce functionality.*
- *Lead collaboration efforts with other tech leads to verify defined development and workflows were reusable across all application contained in IPC's technology stack.*

Mar 2016 - Sep 2020

**Bounteous**

bounteous.com

### SENIOR ARCHITECT

- *Interfaced directly with clients during meetings, leveraging interpersonal communication skills to accurately ascertain customer needs, establish rapport, and build trustworthy client relationships.*
- *Liaised between technical and business teams, utilizing knowledge of technical design, development, and business requirements to ensure client vision aligned with design and developer capabilities.*
- *Spearheaded development of web applications, web sites, and data storage platforms for major clients such as Zipcar, Domino's, and Edward Jones, collaborating closely with project manager and up to 20 developers to successfully support projects from launch to completion.*
- *Created customized services for client content management systems in Drupal, employing problem solving and development capabilities to drive innovative solutions exceeding client expectations.*
- *Implemented Agile development practices, running two-week sprints to maintain project trajectory and complete projects by deadline; streamlined workflows to bolster development efficiency.*
